RADIOLOGY SERIES

MultiView®
Barium Swallow

Innovative and Versatile

The MultiView® is the future of modified barium swallow study platforms. It meets the most current ADA standard for height adjustability down to 19". This modified barium swallow study chair features Fold-Away Safety Handrails, a fold-away self-storing back section, and a bariatric patient weight capacity of 600 lbs. Our video fluoroscopy swallow study chair is an innovative, versatile, safe, and comfortable product.

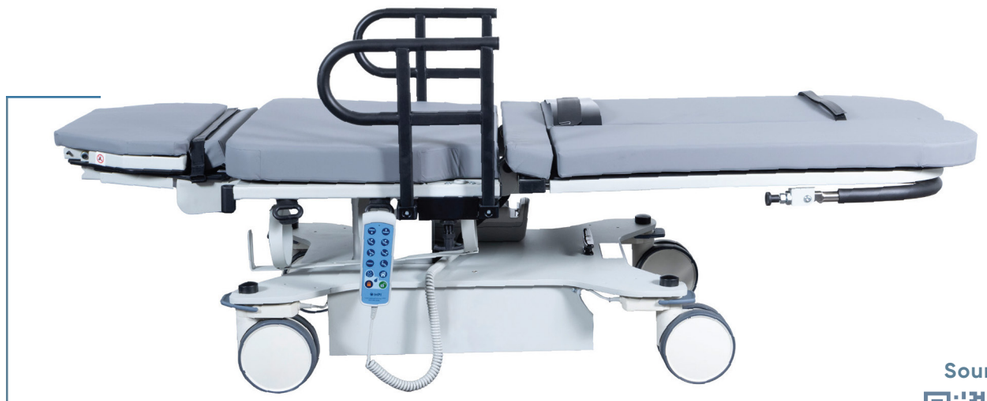
MultiView® Features

The MultiView® promotes greater patient access with unmatched benefits including ADA compliant low transfer heights and bariatric patient support. With versatile options video swallow studies can be performed seamlessly while establishing continuity of care.



Sources

Reduce Costs and Increase profits

Reduce Patient Risk → **Reduce Staff Injury** → **Increase ADA Compliance** → **Increase Patient Satisfaction** → **Increase Staff Retention** → **Increase Profits**

Reduce Patient Risk
1,000,000: Hospital falls per year extending stays by 6.3 days $64,526: Average direct cost of a fall with injury

Reduce Staff Injury
25%: Worker's compensation claims caused by patient handling injuries $15,600: Cost of each claim

Increase ADA Compliance
2,700,000: Americans rely on wheelchairs 19": Wheelchair accessible. Easily increase ADA compliance, with a multi-functional chair

Increase Patient Satisfaction
High patient scores lead to bonuses for hospitals

Increase Staff Retention
20%: of RN's leave because of risk associated with their work $52,350: to replace an RN

Increase Profits
2008: Medicare does not cover the costs associated with inpatient falls. Avoid costs for workplace compensation claims and replacing staff
